Answer ALL questions. Show all your working.

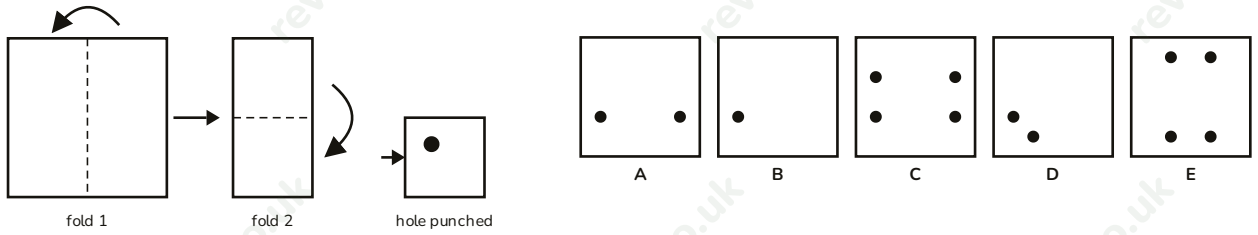

1 A square sheet of paper is folded as shown in the steps, with the dashed line and curved arrow showing each fold. A hole is then punched through all the layers at the place shown. Which of the options A to E shows the sheet opened out flat again, with every hole in its correct position?

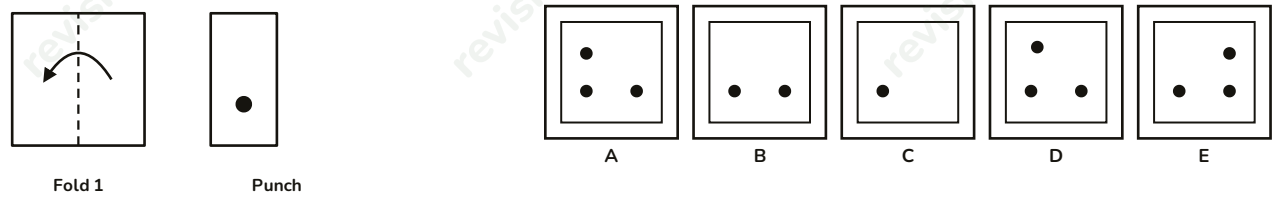

2

3 Study the square sheet of paper described below. It is folded as described, in the direction shown by the arrow(s), and a hole (or holes) is punched through all the layers at the point(s) marked. Which of the options A to E shows the sheet of paper fully opened out flat again, with every resulting hole shown in its correct position?

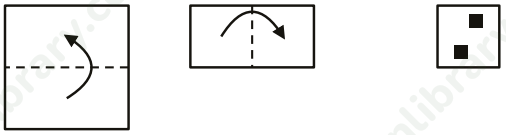

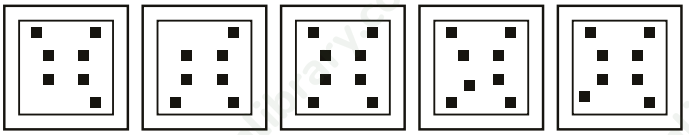

4 A square sheet of paper is folded as shown in the steps, with the dashed line and curved arrow showing each fold. A hole is then punched through all the layers at the place shown. Which of the options A to E shows the sheet opened out flat again, with every hole in its correct position?

Mark scheme · 4.10 Fold and Punch: 1-hour Pack

Question 1

Option A is correct: exactly 4 solid black triangles centred at (5 cm, 1 cm) pointing right; (5 cm, 3 cm) pointing right; (5 cm, 5 cm) pointing right; (5 cm, 7 cm) pointing right. Option B is wrong: there is a hole too many. Option C is wrong: there is a hole too many. Option D is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option E is wrong: there is a hole too many. **B1**

Answer: A) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black triangles centred at (5 cm, 1 cm) pointing right; (5 cm, 3 cm) pointing right; (5 cm, 5 cm) pointing right; (5 cm, 7 cm) pointing right.

Question 2

Option C is correct: exactly 8 solid black squares centred at (1 cm, 3.5 cm); (2.5 cm, 4 cm); (3.5 cm, 1 cm); (4 cm, 2.5 cm); (4 cm, 5.5 cm); (4.5 cm, 7 cm); (5.5 cm, 4 cm); (7 cm, 4.5 cm). Option D is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option A is wrong: a hole is missing. Option B is wrong: a hole is missing. Option E is wrong: a hole is missing. **B1**

Answer: C) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black squares centred at (1 cm, 3.5 cm); (2.5 cm, 4 cm); (3.5 cm, 1 cm); (4 cm, 2.5 cm); (4 cm, 5.5 cm); (4.5 cm, 7 cm); (5.5 cm, 4 cm); (7 cm, 4.5 cm).

Question 3

Option A is wrong: it reflects the hole across only one of the two fold lines, giving two holes instead of four. Option B is wrong: it shows only the single original punched hole, with no reflection across either fold line. Option C is correct: exactly 4 solid black holes (each 0.6cm diameter): one centred 1cm from the left edge and 2cm from the bottom edge; one centred 5cm from the left edge and 2cm from the bottom edge; one centred 1cm from the left edge and 4cm from the bottom edge; one centred 5cm from the left edge and 4cm from the bottom edge. Option D is wrong: it confuses the double straight fold with a single diagonal fold, giving only two holes with the measurements swapped. Option E is wrong: it swaps the two measurements before reflecting across both fold lines, giving four holes in the wrong positions. **B1**

Answer: Option C

Question 4

Option B is correct: exactly 2 solid black circles centred at (2 cm, 2.5 cm); (6 cm, 2.5 cm). Option A is wrong: there is a hole too many. Option C is wrong: a hole is missing. Option D is wrong: there is a hole too many. Option E is wrong: there is a hole too many. **B1**

Answer: B) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (2 cm, 2.5 cm); (6 cm, 2.5 cm).

Question 5

Option C is correct: exactly 8 solid black squares centred at (1.5 cm, 1 cm); (1.5 cm, 7 cm); (2.5 cm, 3 cm); (2.5 cm, 5 cm); (5.5 cm, 3 cm); (5.5 cm, 5 cm); (6.5 cm, 1 cm); (6.5 cm, 7 cm). Option B is wrong: one hole is in the wrong position. Option D is wrong: one hole is in the wrong position. Option E is wrong: one hole is in the wrong position. Option A is wrong: one hole is in the wrong position. **B1**

Answer: C) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black squares centred at (1.5 cm, 1 cm); (1.5 cm, 7 cm); (2.5 cm, 3 cm); (2.5 cm, 5 cm); (5.5 cm, 3 cm); (5.5 cm, 5 cm); (6.5 cm, 1 cm); (6.5 cm, 7 cm).

Question 6

Option D is correct: exactly 4 solid black circles centred at (3 cm, 1 cm); (3 cm, 7 cm); (5 cm, 1 cm); (5 cm, 7 cm). Option A is wrong: there is a hole too many. Option B is wrong: there is a hole too many. Option C is wrong: there is a hole too many. Option E is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). **B1**

Answer: D) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black circles centred at (3 cm, 1 cm); (3 cm, 7 cm); (5 cm, 1 cm); (5 cm, 7 cm).

Question 7

Option E is correct: exactly 2 solid black circles centred at (1.5 cm, 6 cm); (6 cm, 1.5 cm). Option B is wrong: there is a hole too many. Option C is wrong: there is a hole too many. Option A is wrong: there is a hole too many. Option D is wrong: there is a hole too many. **B1**

Answer: E) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (1.5 cm, 6 cm); (6 cm, 1.5 cm).

Question 8

Option D is correct: exactly 4 solid black triangles centred at (1 cm, 7 cm) pointing down; (3 cm, 7 cm) pointing down; (5 cm, 7 cm) pointing down; (7 cm, 7 cm) pointing down. Option A is wrong: the folds have been unfolded in the wrong order. Option C is wrong: there is a hole too many. Option B is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option E is wrong: there is a hole too many. **B1**

Answer: D) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black triangles centred at (1 cm, 7 cm) pointing down; (3 cm, 7 cm) pointing down; (5 cm, 7 cm) pointing down; (7 cm, 7 cm) pointing down.

Question 9

Option E is correct: exactly 2 solid black circles centred at (1.5 cm, 2.5 cm); (1.5 cm, 5.5 cm). Option A is wrong: there is a hole too many. Option B is wrong: there is a hole too many. Option C is wrong: there is a hole too many. Option D is wrong: there is a hole too many. **B1**

Answer: E) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (1.5 cm, 2.5 cm); (1.5 cm, 5.5 cm).

© Revision Library | revisionlibrary.co.uk

Question 10

Option C is correct: exactly 4 solid black squares centred at (1.5 cm, 4 cm); (4 cm, 1.5 cm); (4 cm, 6.5 cm); (6.5 cm, 4 cm). Option B is wrong: a hole is missing. Option D is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option A is wrong: a hole is missing. Option E is wrong: a hole is missing. **B1**

Answer: C) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black squares centred at (1.5 cm, 4 cm); (4 cm, 1.5 cm); (4 cm, 6.5 cm); (6.5 cm, 4 cm).

Question 11

Option A is correct: exactly 4 solid black squares centred at (1 cm, 5.5 cm); (2.5 cm, 7 cm); (5.5 cm, 1 cm); (7 cm, 2.5 cm). Option D is wrong: one hole is in the wrong position. Option B is wrong: one hole is in the wrong position. Option E is wrong: one hole is in the wrong position. Option C is wrong: one hole is in the wrong position. **B1**

Answer: A) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black squares centred at (1 cm, 5.5 cm); (2.5 cm, 7 cm); (5.5 cm, 1 cm); (7 cm, 2.5 cm).

Question 12

Option A is wrong: it shows only the single original punched hole, with no reflection across the free fold line. Option B is wrong: it wrongly treats the hole as being off both fold lines, giving four separate holes instead of two. Option C is wrong: it wrongly mirrors the measurement that lies exactly on the fold line, instead of the other one. Option D is wrong: it shows the two correctly mirrored holes plus an extra phantom hole added at the exact centre of the square. Option E is correct: exactly 2 solid black holes (each 0.6cm diameter): one centred 3cm from the left edge and 1cm from the bottom edge; one centred 3cm from the left edge and 5cm from the bottom edge. **B1**

Answer: Option E

Question 13

Option B is correct: exactly 8 solid black triangles centred at (2.5 cm, 1 cm) pointing up; (2.5 cm, 3 cm) pointing down; (2.5 cm, 5 cm) pointing up; (2.5 cm, 7 cm) pointing down; (7 cm, 1 cm) pointing up; (7 cm, 3 cm) pointing down; (7 cm, 5 cm) pointing up; (7 cm, 7 cm) pointing down. Option A is wrong: there is a hole too many. Option C is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option D is wrong: there is a hole too many. Option E is wrong: the folds have been unfolded in the wrong order. **B1**

Answer: B) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black triangles centred at (2.5 cm, 1 cm) pointing up; (2.5 cm, 3 cm) pointing down; (2.5 cm, 5 cm) pointing up; (2.5 cm, 7 cm) pointing down; (7 cm, 1 cm) pointing up; (7 cm, 3 cm) pointing down; (7 cm, 5 cm) pointing up; (7 cm, 7 cm) pointing down.

Question 14

Option C is correct: exactly 2 solid black circles centred at (4.5 cm, 2.5 cm); (4.5 cm, 5.5 cm). Option D is wrong: a hole is missing. Option B is wrong: there is a hole too many. Option E is wrong: a hole is missing. Option A is wrong: there is a hole too many. **B1**

Answer: C) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (4.5 cm, 2.5 cm); (4.5 cm, 5.5 cm).

Question 15

Option A is correct: exactly 8 solid black squares centred at (1 cm, 2.5 cm); (1 cm, 5.5 cm); (2.5 cm, 1 cm); (2.5 cm, 7 cm); (5.5 cm, 1 cm); (5.5 cm, 7 cm); (7 cm, 2.5 cm); (7 cm, 5.5 cm). Option C is wrong: one hole is in the wrong position. Option E is wrong: one hole is in the wrong position. Option B is wrong: one hole is in the wrong position. Option D is wrong: one hole is in the wrong position. **B1**

Answer: A) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black squares centred at (1 cm, 2.5 cm); (1 cm, 5.5 cm); (2.5 cm, 1 cm); (2.5 cm, 7 cm); (5.5 cm, 1 cm); (5.5 cm, 7 cm); (7 cm, 2.5 cm); (7 cm, 5.5 cm).

Question 16

Option B is correct: exactly 2 solid black circles centred at (3 cm, 6 cm); (6 cm, 3 cm). Option D is wrong: there is a hole too many. Option A is wrong: a hole is missing. Option E is wrong: there is a hole too many. Option C is wrong: there is a hole too many. **B1**

Answer: B) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (3 cm, 6 cm); (6 cm, 3 cm).

Question 17

Option D is correct: exactly 8 solid black squares centred at (1 cm, 1 cm); (1 cm, 7 cm); (1.5 cm, 2.5 cm); (1.5 cm, 5.5 cm); (6.5 cm, 2.5 cm); (6.5 cm, 5.5 cm); (7 cm, 1 cm); (7 cm, 7 cm). Option C is wrong: there is a hole too many. Option B is wrong: there is a hole too many. Option A is wrong: there is a hole too many. Option E is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). **B1**

Answer: D) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black squares centred at (1 cm, 1 cm); (1 cm, 7 cm); (1.5 cm, 2.5 cm); (1.5 cm, 5.5 cm); (6.5 cm, 2.5 cm); (6.5 cm, 5.5 cm); (7 cm, 1 cm); (7 cm, 7 cm).

© Revision Library | revisionlibrary.co.uk

Question 18

Option C is correct: exactly 8 solid black triangles centred at (1 cm, 2.5 cm) pointing up; (1 cm, 5.5 cm) pointing up; (2.5 cm, 1 cm) pointing right; (2.5 cm, 7 cm) pointing left; (5.5 cm, 1 cm) pointing right; (5.5 cm, 7 cm) pointing left; (7 cm, 2.5 cm) pointing down; (7 cm, 5.5 cm) pointing down. Option A is wrong: a hole is missing. Option B is wrong: the triangles have not been reflected with the paper. Option D is wrong: a hole is missing. Option E is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). **B1**

Answer: C) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black triangles centred at (1 cm, 2.5 cm) pointing up; (1 cm, 5.5 cm) pointing up; (2.5 cm, 1 cm) pointing right; (2.5 cm, 7 cm) pointing left; (5.5 cm, 1 cm) pointing right; (5.5 cm, 7 cm) pointing left; (7 cm, 2.5 cm) pointing down; (7 cm, 5.5 cm) pointing down.

Question 19

Option A is correct: exactly 8 solid black squares centred at (5 cm, 1 cm); (5 cm, 3 cm); (5 cm, 5 cm); (5 cm, 7 cm); (7 cm, 1 cm); (7 cm, 3 cm); (7 cm, 5 cm); (7 cm, 7 cm). Option C is wrong: the folds have been unfolded in the wrong order. Option B is wrong: one hole is in the wrong position. Option E is wrong: one hole is in the wrong position. Option D is wrong: one hole is in the wrong position. **B1**

Answer: A) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black squares centred at (5 cm, 1 cm); (5 cm, 3 cm); (5 cm, 5 cm); (5 cm, 7 cm); (7 cm, 1 cm); (7 cm, 3 cm); (7 cm, 5 cm); (7 cm, 7 cm).

Question 20

Option E is correct: exactly 8 solid black circles centred at (1 cm, 3 cm); (2 cm, 4 cm); (3 cm, 1 cm); (4 cm, 2 cm); (4 cm, 6 cm); (5 cm, 7 cm); (6 cm, 4 cm); (7 cm, 5 cm). Option D is wrong: there is a hole too many. Option A is wrong: there is a hole too many. Option C is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option B is wrong: there is a hole too many. **B1**

Answer: E) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black circles centred at (1 cm, 3 cm); (2 cm, 4 cm); (3 cm, 1 cm); (4 cm, 2 cm); (4 cm, 6 cm); (5 cm, 7 cm); (6 cm, 4 cm); (7 cm, 5 cm).

Question 21

Option D is correct: exactly 2 solid black circles centred at (2.5 cm, 7 cm); (7 cm, 2.5 cm). Option A is wrong: a hole is missing. Option E is wrong: there is a hole too many. Option B is wrong: a hole is missing. Option C is wrong: there is a hole too many. **B1**

Answer: D) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (2.5 cm, 7 cm); (7 cm, 2.5 cm).

Question 22

Option E is correct: exactly 4 solid black squares centred at (2.5 cm, 4 cm); (4 cm, 2.5 cm); (4 cm, 5.5 cm); (5.5 cm, 4 cm). Option A is wrong: a hole is missing. Option D is wrong: a hole is missing. Option C is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option B is wrong: a hole is missing. **B1**

Answer: E) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black squares centred at (2.5 cm, 4 cm); (4 cm, 2.5 cm); (4 cm, 5.5 cm); (5.5 cm, 4 cm).

Question 23

Option B is correct: exactly 8 solid black squares centred at (1 cm, 2.5 cm); (2.5 cm, 1 cm); (2.5 cm, 4 cm); (4 cm, 2.5 cm); (4 cm, 5.5 cm); (5.5 cm, 4 cm); (5.5 cm, 7 cm); (7 cm, 5.5 cm). Option A is wrong: one hole is in the wrong position. Option D is wrong: one hole is in the wrong position. Option C is wrong: one hole is in the wrong position. Option E is wrong: one hole is in the wrong position. **B1**

Answer: B) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black squares centred at (1 cm, 2.5 cm); (2.5 cm, 1 cm); (2.5 cm, 4 cm); (4 cm, 2.5 cm); (4 cm, 5.5 cm); (5.5 cm, 4 cm); (5.5 cm, 7 cm); (7 cm, 5.5 cm).

Question 24

Option C is correct: exactly 8 solid black triangles centred at (1.5 cm, 1 cm) pointing right; (1.5 cm, 7 cm) pointing right; (2 cm, 2.5 cm) pointing right; (2 cm, 5.5 cm) pointing right; (6 cm, 2.5 cm) pointing left; (6 cm, 5.5 cm) pointing left; (6.5 cm, 1 cm) pointing left; (6.5 cm, 7 cm) pointing left. Option D is wrong: a hole is missing. Option A is wrong: a hole is missing. Option E is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option B is wrong: a hole is missing. **B1**

Answer: C) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black triangles centred at (1.5 cm, 1 cm) pointing right; (1.5 cm, 7 cm) pointing right; (2 cm, 2.5 cm) pointing right; (2 cm, 5.5 cm) pointing right; (6 cm, 2.5 cm) pointing left; (6 cm, 5.5 cm) pointing left; (6.5 cm, 1 cm) pointing left; (6.5 cm, 7 cm) pointing left.

Question 25

Option A is correct: exactly 2 solid black circles centred at (1 cm, 2.5 cm); (2.5 cm, 1 cm). Option D is wrong: there is a hole too many. Option B is wrong: there is a hole too many. Option E is wrong: a hole is missing. Option C is wrong: there is a hole too many. **B1**

Answer: A) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (1 cm, 2.5 cm); (2.5 cm, 1 cm).

© Revision Library | revisionlibrary.co.uk

Question 26

Option D is correct: exactly 8 solid black circles centred at (1 cm, 2.5 cm); (1 cm, 5.5 cm); (2.5 cm, 1 cm); (2.5 cm, 7 cm); (5.5 cm, 1 cm); (5.5 cm, 7 cm); (7 cm, 2.5 cm); (7 cm, 5.5 cm). Option A is wrong: one hole is in the wrong position. Option B is wrong: one hole is in the wrong position. Option E is wrong: one hole is in the wrong position. Option C is wrong: one hole is in the wrong position. **B1**

Answer: D) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black circles centred at (1 cm, 2.5 cm); (1 cm, 5.5 cm); (2.5 cm, 1 cm); (2.5 cm, 7 cm); (5.5 cm, 1 cm); (5.5 cm, 7 cm); (7 cm, 2.5 cm); (7 cm, 5.5 cm).

Question 27

Option E is correct: exactly 8 solid black circles centred at (1 cm, 1 cm); (1 cm, 5 cm); (3 cm, 1 cm); (3 cm, 5 cm); (5 cm, 1 cm); (5 cm, 5 cm); (7 cm, 1 cm); (7 cm, 5 cm). Option A is wrong: there is a hole too many. Option B is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option C is wrong: there is a hole too many. Option D is wrong: there is a hole too many. **B1**

Answer: E) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black circles centred at (1 cm, 1 cm); (1 cm, 5 cm); (3 cm, 1 cm); (3 cm, 5 cm); (5 cm, 1 cm); (5 cm, 5 cm); (7 cm, 1 cm); (7 cm, 5 cm).

Question 28

Option A is correct: exactly 4 solid black triangles centred at (1 cm, 4 cm) pointing down; (4 cm, 1 cm) pointing left; (4 cm, 7 cm) pointing right; (7 cm, 4 cm) pointing up. Option C is wrong: the triangles have not been reflected with the paper. Option E is wrong: the triangles have not been reflected with the paper. Option B is wrong: a hole is missing. Option D is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). **B1**

Answer: A) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black triangles centred at (1 cm, 4 cm) pointing down; (4 cm, 1 cm) pointing left; (4 cm, 7 cm) pointing right; (7 cm, 4 cm) pointing up.

Question 29

Option B is correct: exactly 8 solid black circles centred at (1.5 cm, 1 cm); (1.5 cm, 3 cm); (1.5 cm, 5 cm); (1.5 cm, 7 cm); (6.5 cm, 1 cm); (6.5 cm, 3 cm); (6.5 cm, 5 cm); (6.5 cm, 7 cm). Option C is wrong: the folds have been unfolded in the wrong order. Option D is wrong: one hole is in the wrong position. Option A is wrong: one hole is in the wrong position. Option E is wrong: one hole is in the wrong position. **B1**

Answer: B) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black circles centred at (1.5 cm, 1 cm); (1.5 cm, 3 cm); (1.5 cm, 5 cm); (1.5 cm, 7 cm); (6.5 cm, 1 cm); (6.5 cm, 3 cm); (6.5 cm, 5 cm); (6.5 cm, 7 cm).

Question 30

Option A is wrong: it shows only the single punched hole, with no mirror-image hole added when the paper is unfolded. Option B is wrong: it shows the two correctly mirrored holes but with an extra phantom hole added exactly on the fold line. Option C is wrong: it mirrors the wrong measurement (the distance that should stay fixed has been flipped, and the distance that should be flipped has been kept fixed). Option D is correct: exactly 2 solid black holes (each 0.6cm diameter): one centred 5.5cm from the left edge and 0.5cm from the bottom edge; one centred 0.5cm from the left edge and 0.5cm from the bottom edge. Option E is wrong: it swaps the two measurements (distance from the left edge and distance from the bottom edge) before mirroring, so the whole hole pattern is in the wrong orientation. **B1**

Answer: Option D

Question 31

Option D is correct: exactly 2 solid black circles centred at (5 cm, 2 cm); (5 cm, 6 cm). Option A is wrong: there is a hole too many. Option B is wrong: a hole is missing. Option C is wrong: there is a hole too many. Option E is wrong: there is a hole too many. **B1**

Answer: D) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (5 cm, 2 cm); (5 cm, 6 cm).

Question 32

Option E is correct: exactly 4 solid black circles centred at (1 cm, 4.5 cm); (3.5 cm, 7 cm); (4.5 cm, 1 cm); (7 cm, 3.5 cm). Option A is wrong: a hole is missing. Option B is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option C is wrong: a hole is missing. Option D is wrong: a hole is missing. **B1**

Answer: E) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black circles centred at (1 cm, 4.5 cm); (3.5 cm, 7 cm); (4.5 cm, 1 cm); (7 cm, 3.5 cm).

Question 33

Option A is correct: exactly 8 solid black circles centred at (1 cm, 2.5 cm); (1 cm, 4 cm); (2.5 cm, 1 cm); (4 cm, 1 cm); (4 cm, 7 cm); (5.5 cm, 7 cm); (7 cm, 4 cm); (7 cm, 5.5 cm). Option B is wrong: one hole is in the wrong position. Option C is wrong: one hole is in the wrong position. Option D is wrong: one hole is in the wrong position. Option E is wrong: one hole is in the wrong position. **B1**

Answer: A) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black circles centred at (1 cm, 2.5 cm); (1 cm, 4 cm); (2.5 cm, 1 cm); (4 cm, 1 cm); (4 cm, 7 cm); (5.5 cm, 7 cm); (7 cm, 4 cm); (7 cm, 5.5 cm).

Question 34

Option C is correct: exactly 4 solid black circles centred at (1 cm, 3 cm); (3 cm, 3 cm); (5 cm, 3 cm); (7 cm, 3 cm). Option A is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option B is wrong: the folds have been unfolded in the wrong order. Option D is wrong: there is a hole too many. Option E is wrong: there is a hole too many. **B1**

Answer: C) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black circles centred at (1 cm, 3 cm); (3 cm, 3 cm); (5 cm, 3 cm); (7 cm, 3 cm).

Question 35

Option C is correct: exactly 2 solid black circles centred at (1.5 cm, 3 cm); (6.5 cm, 3 cm). Option B is wrong: there is a hole too many. Option D is wrong: there is a hole too many. Option A is wrong: there is a hole too many. Option E is wrong: there is a hole too many. **B1**

Answer: C) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (1.5 cm, 3 cm); (6.5 cm, 3 cm).

Question 36

Option B is correct: exactly 4 solid black circles centred at (2 cm, 2.5 cm); (2 cm, 5.5 cm); (6 cm, 2.5 cm); (6 cm, 5.5 cm). Option A is wrong: a hole is missing. Option C is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option D is wrong: a hole is missing. Option E is wrong: a hole is missing. **B1**

Answer: B) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 4 solid black circles centred at (2 cm, 2.5 cm); (2 cm, 5.5 cm); (6 cm, 2.5 cm); (6 cm, 5.5 cm).

Question 37

Option A is correct: exactly 8 solid black triangles centred at (1 cm, 3 cm) pointing right; (2 cm, 4 cm) pointing right; (3 cm, 1 cm) pointing up; (4 cm, 2 cm) pointing up; (4 cm, 6 cm) pointing down; (5 cm, 7 cm) pointing down; (6 cm, 4 cm) pointing left; (7 cm, 5 cm) pointing left. Option B is wrong: there is a hole too many. Option C is wrong: the last fold has not been unfolded (the holes from the final reflection are missing). Option E is wrong: there is a hole too many. Option D is wrong: the triangles have not been reflected with the paper. **B1**

Answer: A) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 8 solid black triangles centred at (1 cm, 3 cm) pointing right; (2 cm, 4 cm) pointing right; (3 cm, 1 cm) pointing up; (4 cm, 2 cm) pointing up; (4 cm, 6 cm) pointing down; (5 cm, 7 cm) pointing down; (6 cm, 4 cm) pointing left; (7 cm, 5 cm) pointing left.

Question 38

Option A is correct: exactly 2 solid black holes (each 0.6cm diameter): one centred 0.5cm from the left edge and 5.5cm from the bottom edge; one centred 0.5cm from the left edge and 0.5cm from the bottom edge. Option B is wrong: it shows only the single punched hole, with no mirror-image hole added when the paper is unfolded. Option C is wrong: it shows the two correctly mirrored holes but with an extra phantom hole added exactly on the fold line. Option D is wrong: it mirrors the wrong measurement (the distance that should stay fixed has been flipped, and the distance that should be flipped has been kept fixed). Option E is wrong: it swaps the two measurements (distance from the left edge and distance from the bottom edge) before mirroring, so the whole hole pattern is in the wrong orientation. **B1**

Answer: Option A

Question 39

Option E is correct: exactly 2 solid black circles centred at (2 cm, 1.5 cm); (6.5 cm, 6 cm). Option B is wrong: there is a hole too many. Option D is wrong: there is a hole too many. Option C is wrong: a hole is missing. Option A is wrong: there is a hole too many. **B1**

Answer: E) A 8 cm by 8 cm square, fully unfolded and flattened out, showing exactly 2 solid black circles centred at (2 cm, 1.5 cm); (6.5 cm, 6 cm).

Question 40

Option A is wrong: it reflects only one of the two punched holes across the diagonal, and omits the mirror image of the other. Option B is wrong: it reflects both holes across the OTHER diagonal of the square instead of the actual fold line. Option C is wrong: it reflects both holes using a straight (vertical) mirror line instead of the diagonal fold line. Option D is wrong: it shows all four correctly mirrored holes plus an extra phantom hole added on the diagonal fold line. Option E is correct: exactly 4 solid black holes (each 0.6cm diameter): one centred 5cm from the left edge and 3cm from the bottom edge; one centred 3cm from the left edge and 1cm from the bottom edge; one centred 4cm from the left edge and 5cm from the bottom edge; one centred 1cm from the left edge and 2cm from the bottom edge. **B1**

Answer: Option E

Question 41

Option A is wrong: it shows only the single punched hole, with no mirror-image hole added when the paper is unfolded. Option B is wrong: it shows the two correctly mirrored holes but with an extra phantom hole added exactly on the fold line. Option C is wrong: it mirrors the wrong measurement (the distance that should stay fixed has been flipped, and the distance that should be flipped has been kept fixed). Option D is wrong: it swaps the two measurements (distance from the left edge and distance from the bottom edge) before mirroring, so the whole hole pattern is in the wrong orientation. Option E is correct: exactly 2 solid black holes (each 0.6cm diameter): one centred 4.5cm from the left edge and 2cm from the bottom edge; one centred 4.5cm from the left edge and 4cm from the bottom edge. **B1**

Answer: Option E
