Name: _____ Date: ____ / ____ / _____

Answer ALL questions. Show all your working.

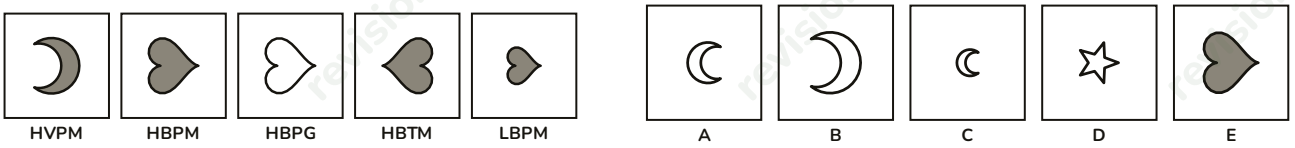

1 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code TPS.

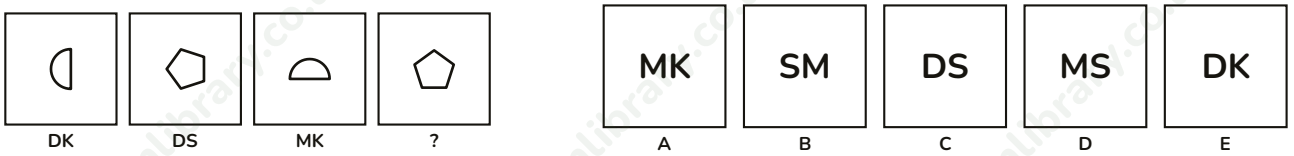

2 Study Examples 1 to 3 below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code given.

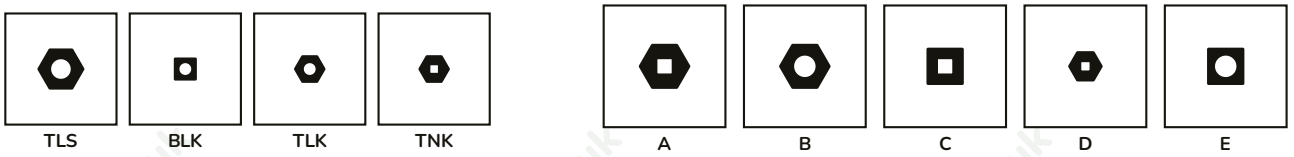

3 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code LVTG.

4 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

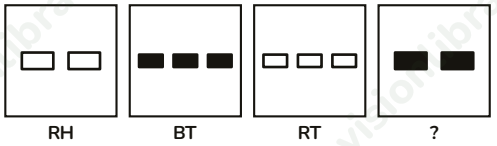

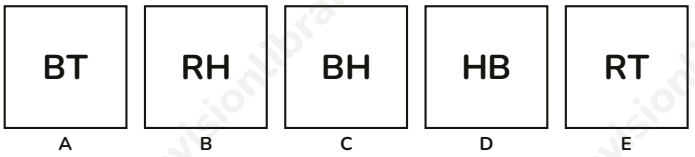

5 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code BNS.

6 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

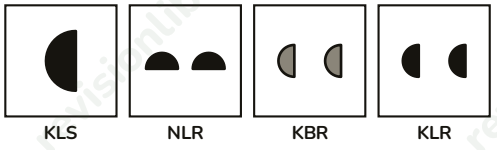

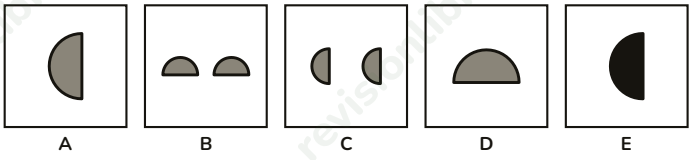

7

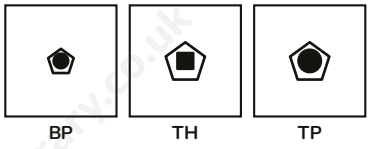

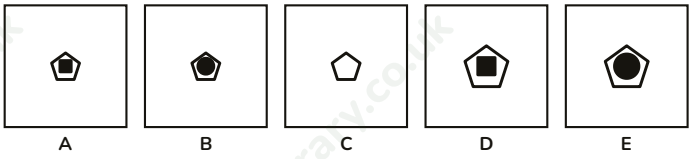

8 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code NBS.

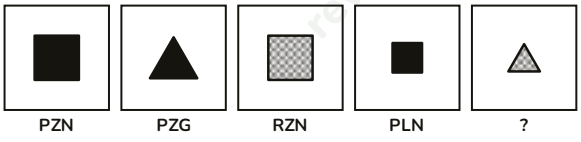

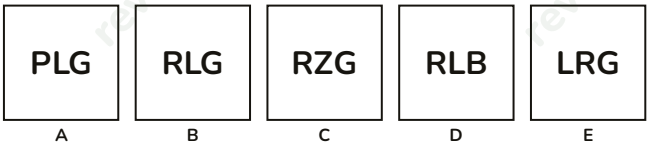

9 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code BH.

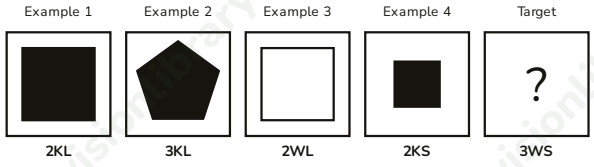

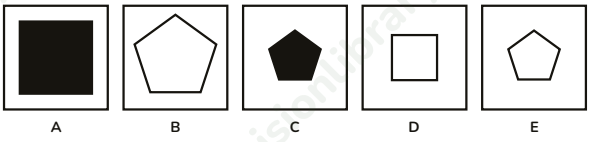

10 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

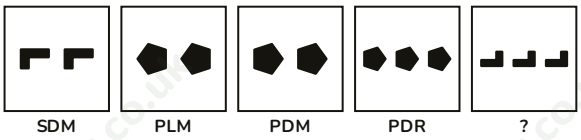

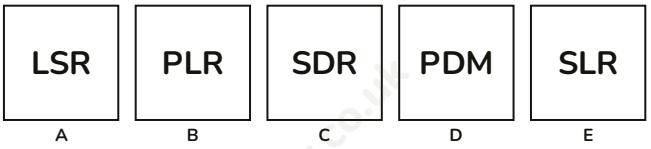

11 Study Examples 1 to 4 below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code given.

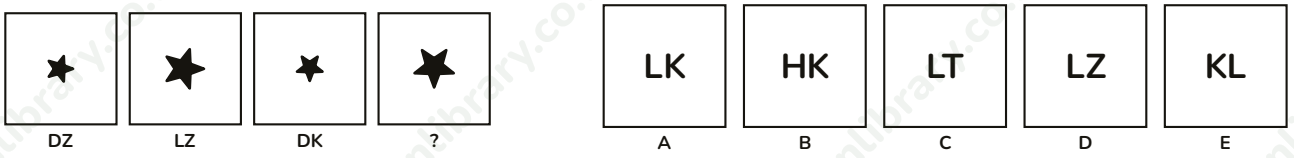

12 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

13

14 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code VLZ.

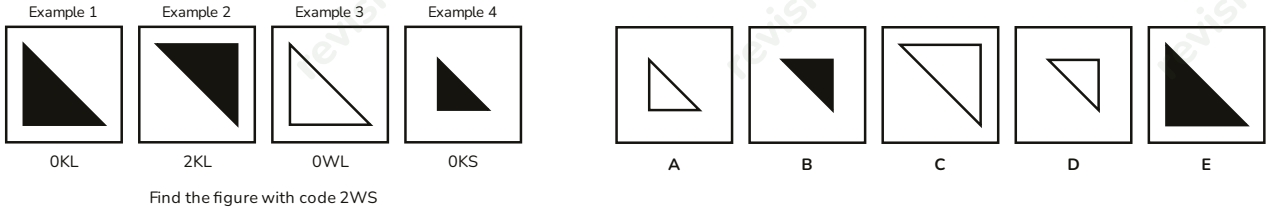

15 Study Examples 1 to 3 below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code given.

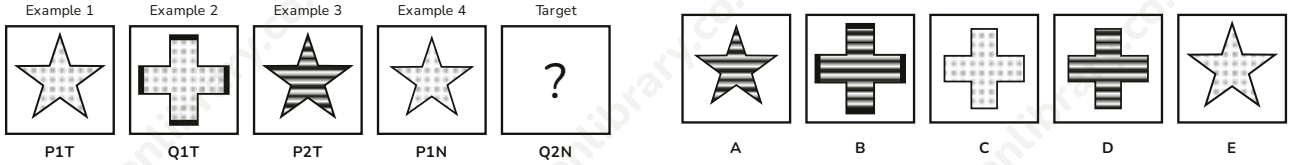

16 Study Examples 1 to 4 below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code given.

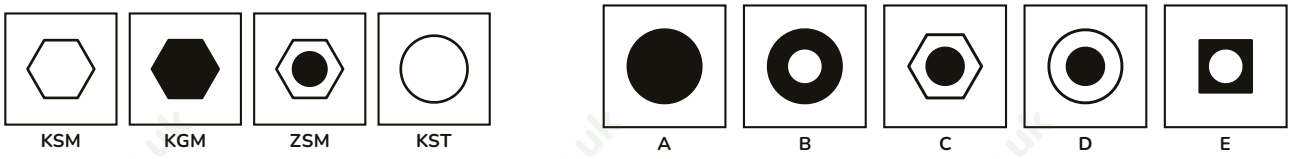

17

18

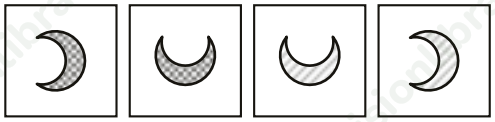

19 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code ZGT.

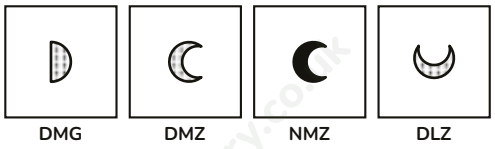

© Revision Library | revisionlibrary.co.uk

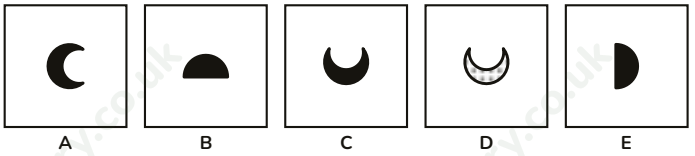

20 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

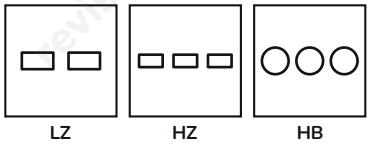

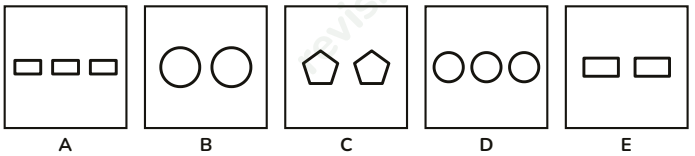

21 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code NLG.

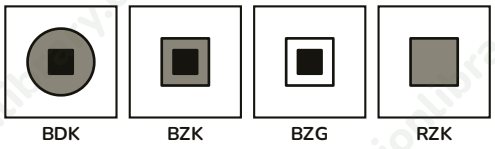

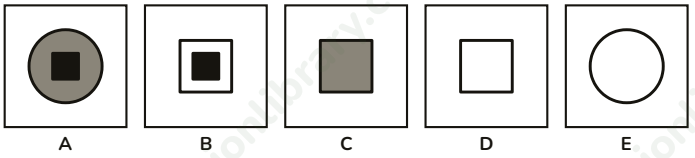

22 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code LB.

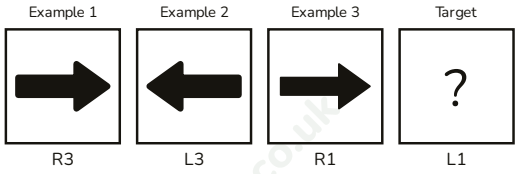

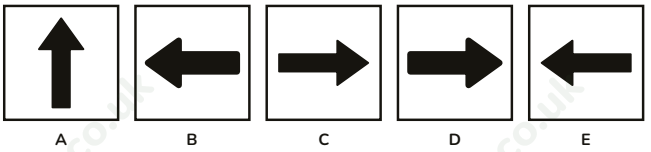

23 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code RDG.

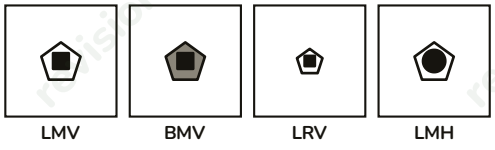

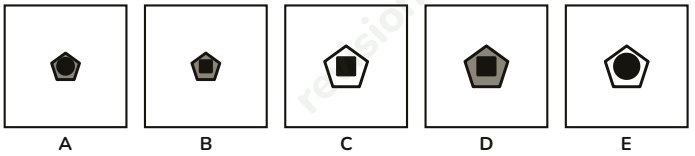

24 Study Examples 1 to 3 below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code given.

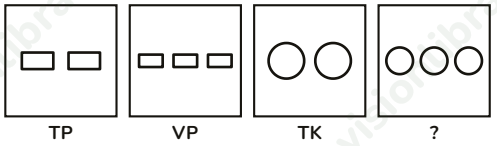

25 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code BRH.

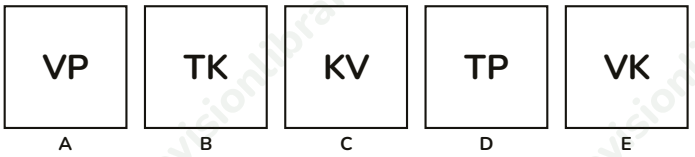

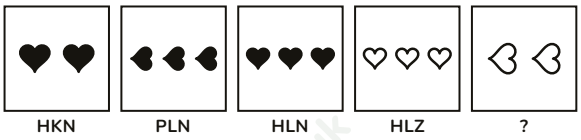

© Revision Library | revisionlibrary.co.uk

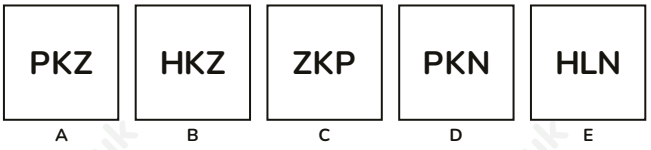

26 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

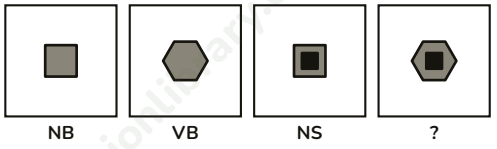

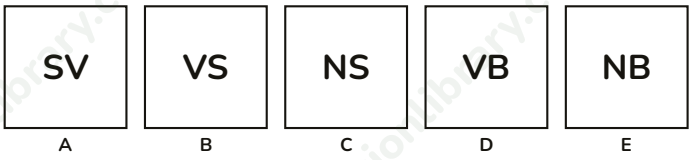

27

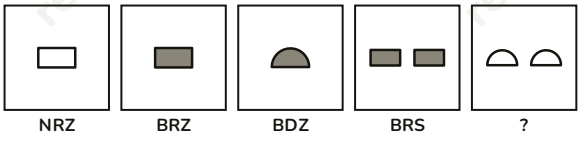

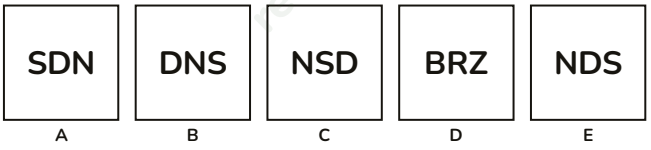

28

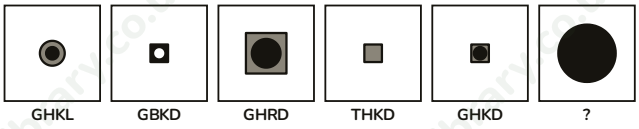

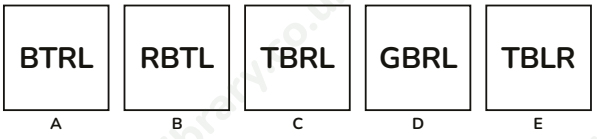

29

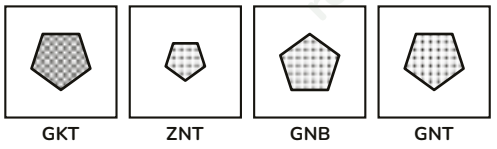

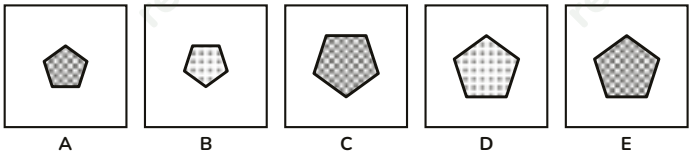

30

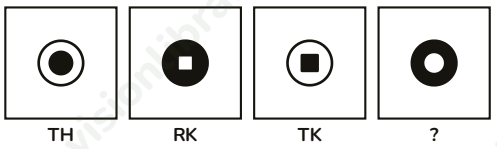

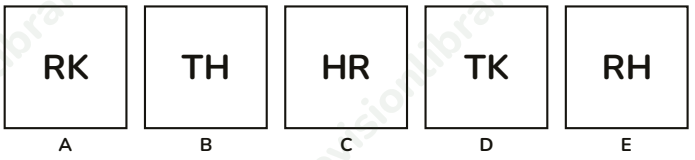

31 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code ZKB.

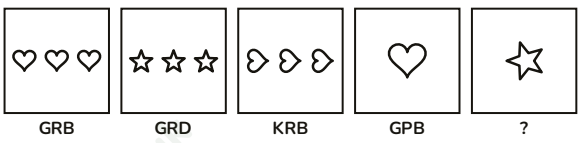

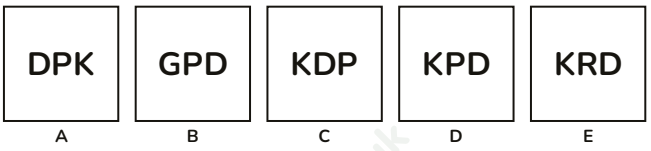

32 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

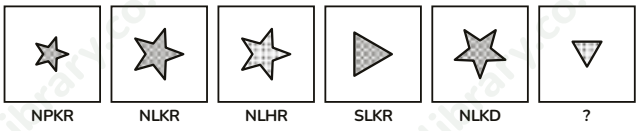

33

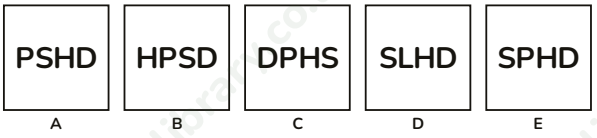

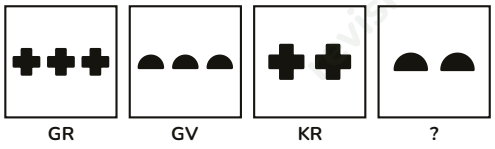

© Revision Library | revisionlibrary.co.uk

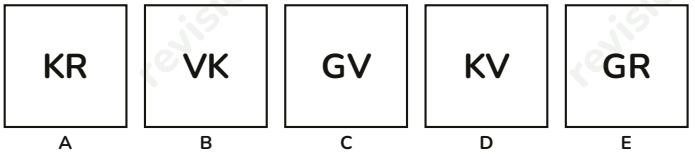

34

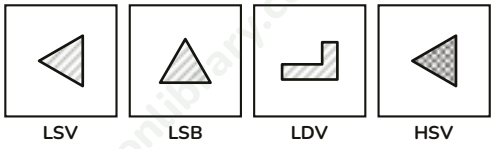

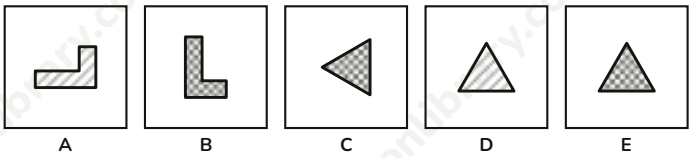

35

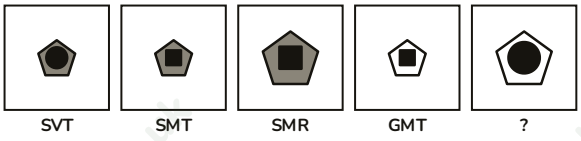

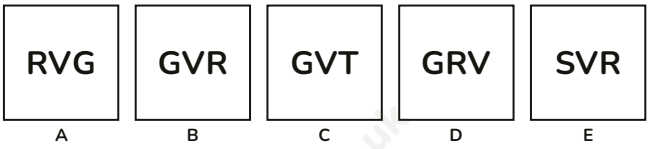

36 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code HDB.

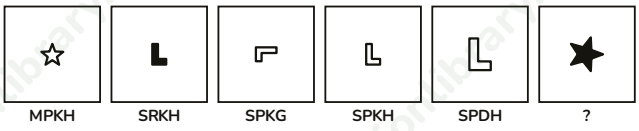

37 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

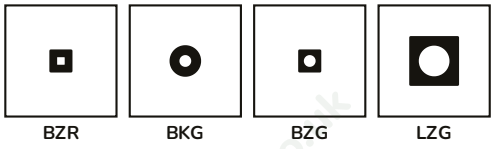

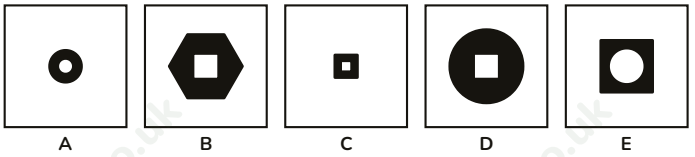

38

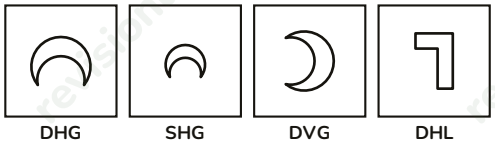

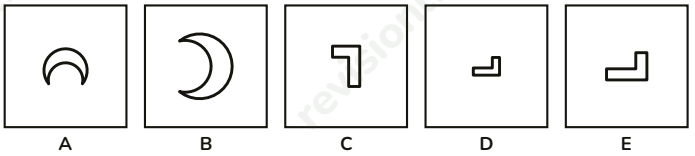

39 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code LKR.

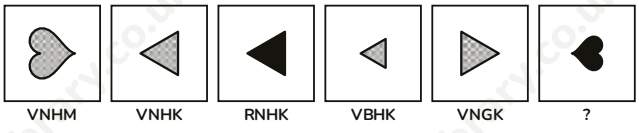

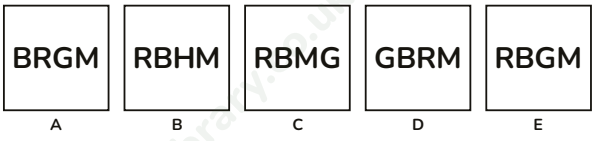

40 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code SVL.

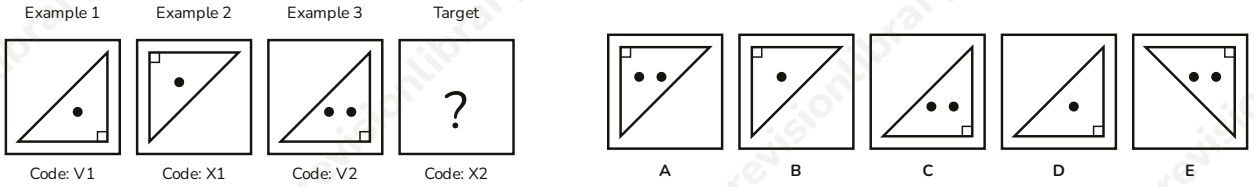

41 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

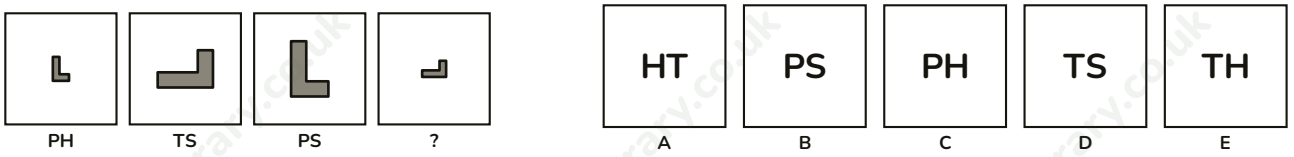

© Revision Library | revisionlibrary.co.uk

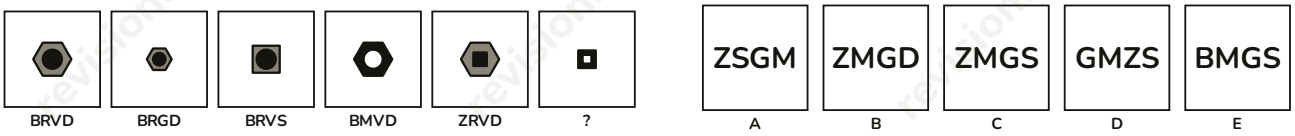

42 Study Examples 1 to 3 below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code given.

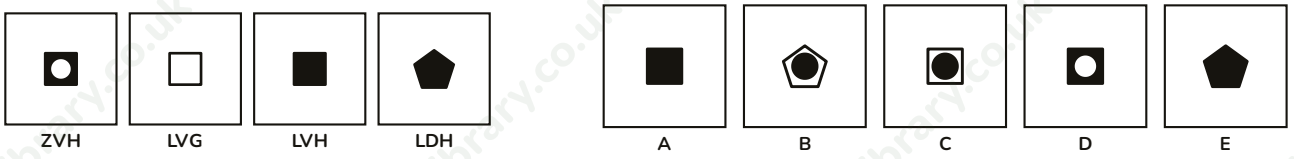

43 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

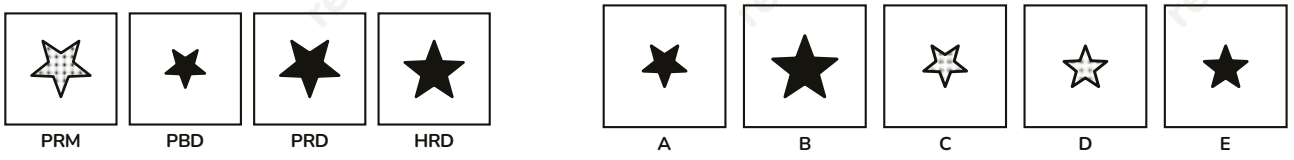

44

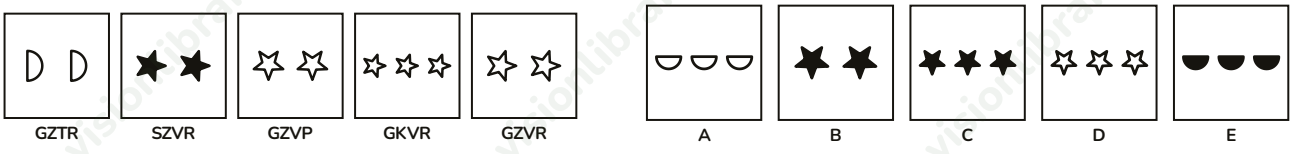

45 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code ZDG.

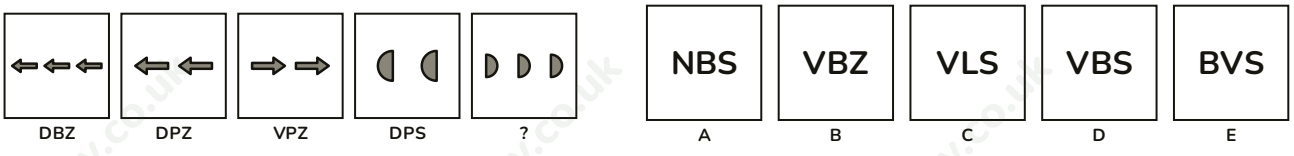

46 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code HBM.

47 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code SKTP.

48 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

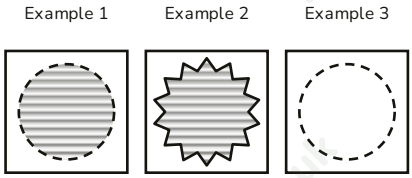

© Revision Library | revisionlibrary.co.uk

49

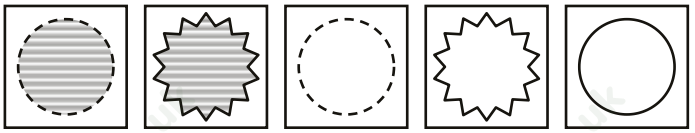

50 Study Examples 1 to 3 below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code given.

Find the figure with code C3Z

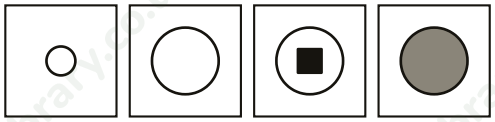

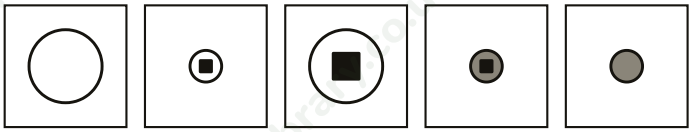

51 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code HKNT.

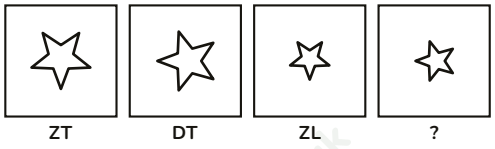

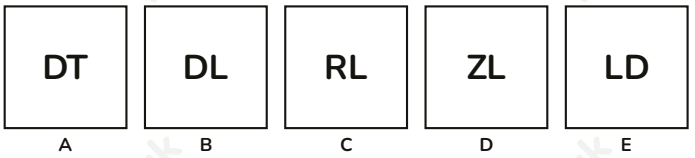

52 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code HMV.

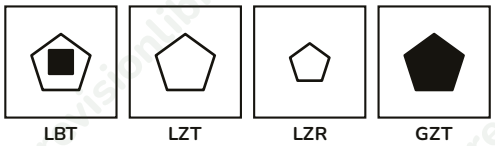

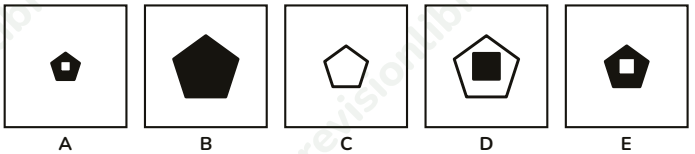

53 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

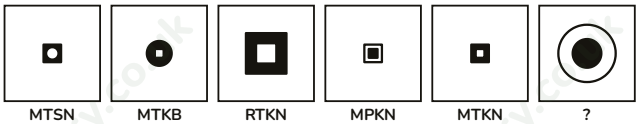

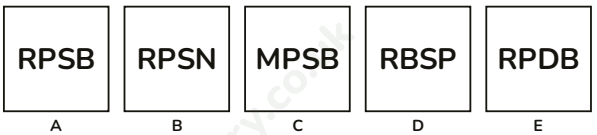

54 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code GBR.

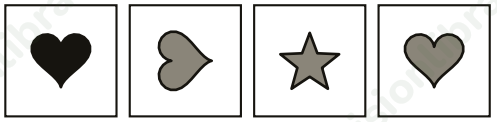

55 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

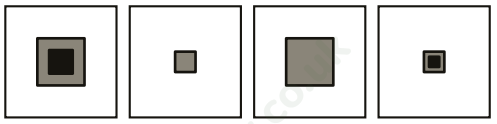

© Revision Library | revisionlibrary.co.uk

56 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code DZM.

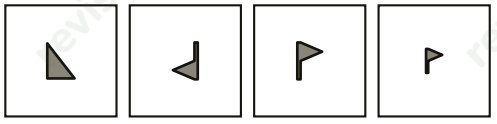

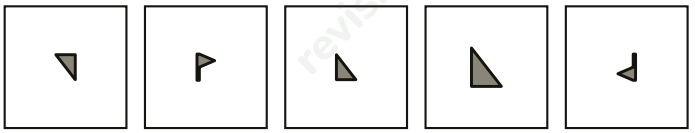

57 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

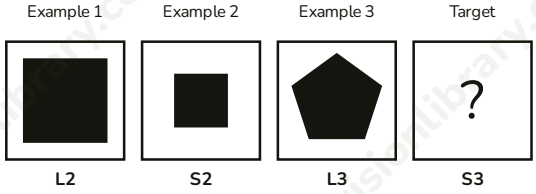

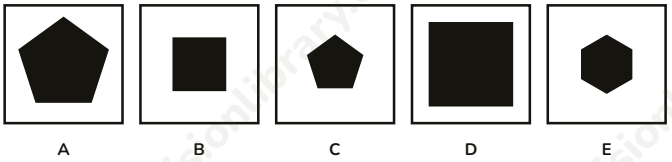

58 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code BNL.

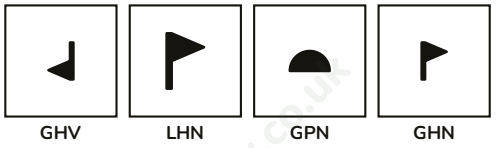

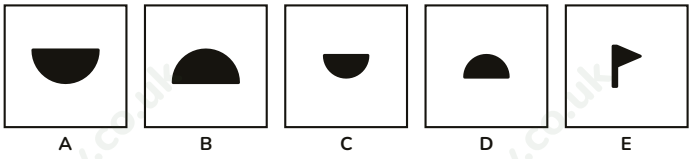

59 Study Examples 1 to 3 below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code given.

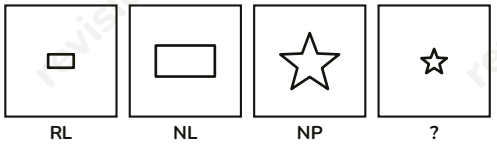

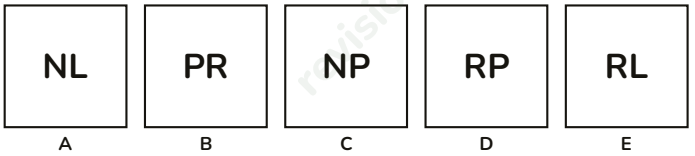

60 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code LPV.

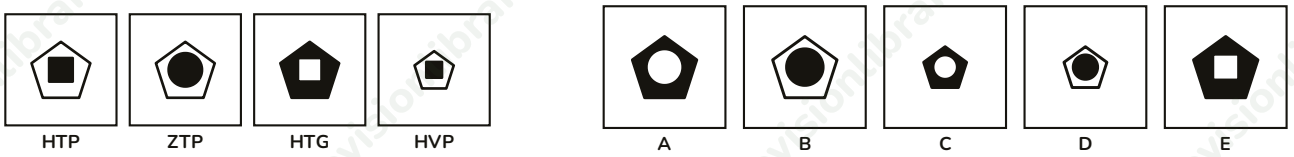

61 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

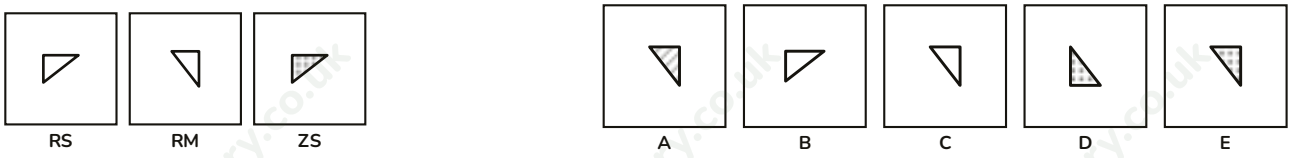

© Revision Library | revisionlibrary.co.uk

62 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code ZVG.

63 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code ZM.

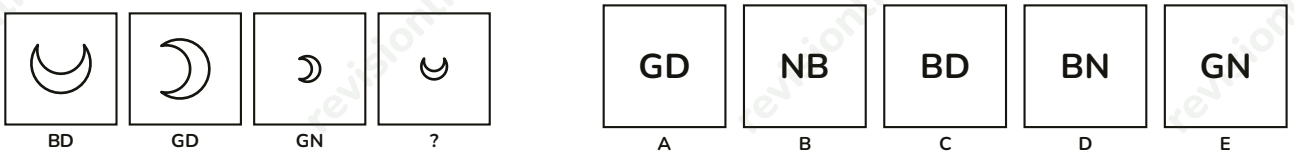

64 Study the examples below to work out the rule linking each code to its figure. Then work out which option (A to E) is the code for the figure marked '?'.

65

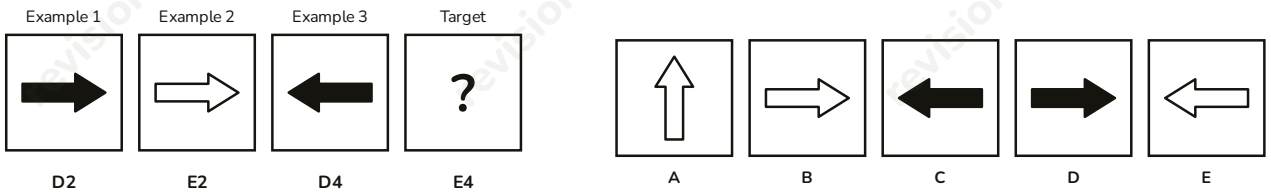

66

67

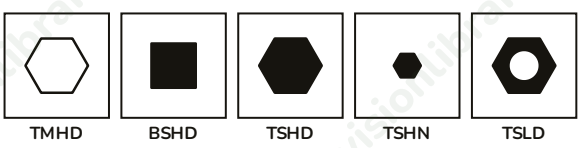

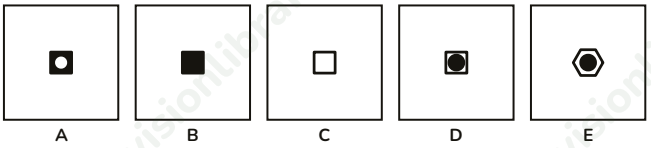

68 Study Examples 1 to 3 below to work out the rule linking each code to its figure. Then work out which option (A to E) shows the figure with the code given.

Mark scheme · 4.18 Shape Codes: 2-hour Pack

Question 1

selects option E: the code TPS means kind arrow, count 1, turn turned 90 degrees clockwise (cao) **B1**

Answer: E) A medium solid black arrow pointing right

Question 2

Correct option identified (D oe, cao) - combines the confirmed code for diagonal hatching (H) with the confirmed code for hexagon (X) **B1**

Answer: D

Question 3

selects option A: the code LVTG means size medium, kind crescent, turn turned 90 degrees clockwise, fill unshaded (white) (cao) **B1**

Answer: A) A medium unshaded (white) crescent with its tips facing right

Question 4

selects option D: turn turned 0 degrees clockwise is M, kind pentagon is S (cao) **B1**

Answer: D) MS

Question 5

selects option C: the code BNS means kind square, inner with an inner square, size medium (cao) **B1**

Answer: C) A medium solid black square, with a small unshaded (white) square centred inside it

Question 6

selects option C: fill solid black is B, count 2 is H (cao) **B1**

Answer: C) BH

Question 7

selects option E: kind arrow is Z, count 2 is K, fill mid-grey is P (cao) **B1**

Answer: E) ZKP

Question 8

selects option D: the code NBS means turn turned 0 degrees clockwise, fill mid-grey, count 1 (cao) **B1**

Answer: D) A large mid-grey semicircle with its curved side facing up

Question 9

selects option A: the code BH means size small, inner with an inner square (cao) **B1**

Answer: A) A small unshaded (white) pentagon with one point facing up, with a small solid black square centred inside it

Question 10

selects option B: fill cross-hatched is R, size medium is L, kind triangle is G (cao) **B1**

Answer: B) RLG

Question 11

Correct option identified (E oe, cao) - all three code positions correctly combined: pentagon (3), unshaded (W) and small (S) **B1**

Answer: E

Question 12

selects option E: kind L-shape is S, turn turned 270 degrees clockwise is L, count 3 is R (cao) **B1**

Answer: E) SLR

Question 13

selects option A: size medium is L, turn turned 180 degrees clockwise is K (cao) **B1**

Answer: A) LK

Question 14

selects option B: the code VLZ means inner with no inner shape, kind square, fill unshaded (white) (cao) **B1**

Answer: B) A medium unshaded (white) square

Question 15

Correct option identified (D oe, cao) - combines the confirmed code for two shapes (B) with the confirmed code for grey shading (N) **B1**

Answer: D

Question 16

Correct option identified (E oe, cao) - all three code positions correctly combined: oval (O), grey (2) and thin outline (N) **B1**

Answer: E

Question 17

Correct option identified (D oe, cao) - all three code positions correctly combined: 180-degree rotation (2), unshaded (W) and small (S) **B1**

Answer: D

Question 18

Correct option identified (D oe, cao) - all three code positions correctly combined: cross (Q), horizontal stripes (2) and thin outline (N) **B1**

Answer: D

Question 19

selects option B: the code ZGT means inner with an inner circle, fill solid black, kind circle (cao) **B1**

Answer: B) A large solid black circle, with a small unshaded (white) circle centred inside it

Question 20

selects option B: turn turned 270 degrees clockwise is R, fill diagonally hatched is T (cao) **B1**

Answer: B) RT

© Revision Library | revisionlibrary.co.uk

Question 21

selects option B: the code NLG means fill solid black, turn turned 0 degrees clockwise, kind semicircle (cao) **B1**

Answer: B) A medium solid black semicircle with its curved side facing up

Question 22

selects option B: the code LB means count 2, kind circle (cao) **B1**

Answer: B) Two small unshaded (white) circles side by side in a row

Question 23

selects option E: the code RDG means inner with no inner shape, kind circle, fill unshaded (white) (cao) **B1**

Answer: E) A large unshaded (white) circle

Question 24

Correct option identified (E oe, cao) - combines the confirmed code for pointing left (L) with the confirmed code for thin outline (1) **B1**

Answer: E

Question 25

selects option A: the code BRH means fill mid-grey, size small, inner with an inner circle (cao) **B1**

Answer: A) A small mid-grey pentagon with one point facing up, with a small solid black circle centred inside it

Question 26

selects option E: count 3 is V, kind circle is K (cao) **B1**

Answer: E) VK

Question 27

selects option A: turn turned 90 degrees clockwise is P, count 2 is K, fill unshaded (white) is Z (cao) **B1**

Answer: A) PKZ

Question 28

selects option B: kind hexagon is V, inner with an inner square is S (cao) **B1**

Answer: B) VS

Question 29

selects option E: fill unshaded (white) is N, kind semicircle is D, count 2 is S (cao) **B1**

Answer: E) NDS

Question 30

selects option C: inner with no inner shape is T, fill solid black is B, size large is R, kind circle is L (cao) **B1**

Answer: C) TBRL

Question 31

selects option A: the code ZKB means size medium, fill cross-hatched, turn turned 0 degrees clockwise (cao) **B1**

Answer: A) A medium cross-hatched pentagon with one point facing up

Question 32

selects option E: fill solid black is R, inner with an inner circle is H (cao) **B1**

Answer: E) RH

Question 33

selects option D: turn turned 270 degrees clockwise is K, count 1 is P, kind star is D (cao) **B1**

Answer: D) KPD

Question 34

selects option E: kind triangle is S, size medium is P, fill dotted is H, turn turned 180 degrees clockwise is D (cao) **B1**

Answer: E) SPHD

Question 35

selects option D: count 2 is K, kind semicircle is V (cao) **B1**

Answer: D) KV

Question 36

selects option B: the code HDB means fill cross-hatched, kind L-shape, turn turned 0 degrees clockwise (cao) **B1**

Answer: B) A large cross-hatched L-shape (upright, the L-shape has its tall arm on the left, foot pointing right along the bottom)

Question 37

selects option B: fill unshaded (white) is G, inner with an inner circle is V, size large is R (cao) **B1**

Answer: B) GVR

Question 38

selects option E: kind star is M, fill solid black is R, size medium is D, turn turned 90 degrees clockwise is G (cao) **B1**

Answer: E) MRDG

Question 39

selects option D: the code LKR means size large, kind circle, inner with an inner square (cao) **B1**

Answer: D) A large solid black circle, with a small unshaded (white) square centred inside it

Question 40

selects option E: the code SVL means size medium, turn turned 270 degrees clockwise, kind L-shape (cao) **B1**

Answer: E) A medium unshaded (white) L-shape (turned 270 degrees clockwise) (upright, the L-shape has its tall arm on the left, foot pointing right along the bottom)

Question 41

selects option E: fill solid black is R, size medium is B, turn turned 90 degrees clockwise is G, kind heart is M (cao) **B1**

Answer: E) RBGM

Question 42

Correct option identified (A oe, cao) - combines the confirmed code for 270-degree rotation (X) with the confirmed code for 2 dots (2) **B1**

Answer: A

© Revision Library | revisionlibrary.co.uk

Question 43

selects option E: turn turned 270 degrees clockwise is T, size small is H (cao) **B1**

Answer: E) TH

Question 44

selects option C: inner with an inner square is Z, fill solid black is M, size small is G, kind square is S (cao) **B1**

Answer: C) ZMGS

Question 45

selects option B: the code ZDG means inner with an inner circle, kind pentagon, fill unshaded (white) (cao) **B1**

Answer: B) A medium unshaded (white) pentagon with one point facing up, with a small solid black circle centred inside it

Question 46

selects option D: the code HBM means turn turned 0 degrees clockwise, size medium, fill dotted (cao) **B1**

Answer: D) A medium dotted star with one point facing up

Question 47

selects option E: the code SKTP means fill solid black, count 3, kind semicircle, turn turned 180 degrees clockwise (cao) **B1**

Answer: E) Three small solid black semicircles with their curved sides facing down side by side in a row

Question 48

selects option D: turn turned 90 degrees clockwise is V, count 3 is B, kind semicircle is S (cao) **B1**

Answer: D) VBS

Question 49

selects option A: turn turned 90 degrees clockwise is N, fill unshaded (white) is V, count 3 is M (cao) **B1**

Answer: A) NVM

Question 50

Correct option identified (D oe, cao) - combines the confirmed code for zigzag outline (3) with the confirmed code for unshaded fill (Z) **B1**

Answer: D

Question 51

selects option C: the code HKNT means kind right-angled triangle, fill solid black, count 1, turn turned 270 degrees clockwise (cao) **B1**

Answer: C) A large solid black right-angled triangle (turned 270 degrees clockwise) (upright, the right-angled triangle has its right angle at the bottom left, longer side along the bottom)

Question 52

selects option D: the code HMV means inner with an inner square, size small, fill mid-grey (cao) **B1**

Answer: D) A small mid-grey circle, with a small solid black square centred inside it

Question 53

selects option B: turn turned 270 degrees clockwise is D, size medium is L (cao) **B1**

Answer: B) DL

Question 54

selects option E: the code GBR means fill solid black, inner with an inner square, size medium (cao) **B1**

Answer: E) A medium solid black pentagon with one point facing up, with a small unshaded (white) square centred inside it

Question 55

selects option A: size large is R, fill unshaded (white) is P, inner with an inner circle is S, kind circle is B (cao) **B1**

Answer: A) RPSB

Question 56

selects option B: the code DZM means fill solid black, kind star, turn turned 270 degrees clockwise (cao) **B1**

Answer: B) A large solid black star with one point facing left

Question 57

selects option C: size small is G, inner with an inner square is T (cao) **B1**

Answer: C) GT

Question 58

selects option A: the code BNL means size small, turn turned 180 degrees clockwise, kind right-angled triangle (cao) **B1**

Answer: A) A small mid-grey right-angled triangle (turned 180 degrees clockwise) (upright, the right-angled triangle has its right angle at the bottom left, longer side along the bottom)

Question 59

Correct option identified (C oe, cao) - combines the confirmed code for small (S) with the confirmed code for pentagon (3) **B1**

Answer: C

Question 60

selects option A: the code LPV means size large, kind semicircle, turn turned 180 degrees clockwise (cao) **B1**

Answer: A) A large solid black semicircle with its curved side facing down

Question 61

selects option D: size small is R, kind star is P (cao) **B1**

Answer: D) RP

Question 62

selects option C: the code ZVG means inner with an inner circle, size medium, fill solid black (cao) **B1**

Answer: C) A medium solid black pentagon with one point facing up, with a small unshaded (white) circle centred inside it

© Revision Library | revisionlibrary.co.uk

Question 63

selects option E: the code ZM means fill dotted, turn turned 180 degrees clockwise (cao) **B1**

Answer: E) A medium dotted right-angled triangle (turned 180 degrees clockwise) (upright, the right-angled triangle has its right angle at the bottom left, longer side along the bottom)

Question 64

selects option D: kind circle is B, size large is T, inner with no inner shape is M (cao) **B1**

Answer: D) BTM

Question 65

selects option A: kind pentagon is R, inner with an inner circle is D, size large is S (cao) **B1**

Answer: A) RDS

Question 66

selects option D: turn turned 0 degrees clockwise is B, size small is N (cao) **B1**

Answer: D) BN

Question 67

selects option B: kind triangle is K, turn turned 270 degrees clockwise is T, count 1 is H (cao) **B1**

Answer: B) KTH

Question 68

Correct option identified (E oe, cao) - combines the confirmed code for unshaded (E) with the confirmed code for pointing left (4) **B1**

Answer: E

Question 69

selects option D: the code BMLN means kind square, fill unshaded (white), inner with an inner circle, size small (cao) **B1**

Answer: D) A small unshaded (white) square, with a small solid black circle centred inside it

Question 70

selects option C: turn turned 0 degrees clockwise is D, count 1 is R (cao) **B1**

Answer: C) DR

Question 71

selects option A: kind diamond is T, count 1 is K, fill solid black is H (cao) **B1**

Answer: A) TKH

Question 72

selects option A: the code VRD means turn turned 270 degrees clockwise, count 1, kind pentagon (cao) **B1**

Answer: A) A medium solid black pentagon with one point facing left

Question 73

selects option D: the code RTDV means kind right-angled triangle, size medium, turn turned 0 degrees clockwise, fill cross-hatched (cao) **B1**

Answer: D) A medium cross-hatched right-angled triangle (upright, the right-angled triangle has its right angle at the bottom left, longer side along the bottom)

Question 74

selects option E: count 1 is G, kind L-shape is P, turn turned 90 degrees clockwise is V (cao) **B1**

Answer: E) GPV

Question 75

selects option C: inner with an inner square is K, fill solid black is P, kind pentagon is T (cao) **B1**

Answer: C) KPT

Question 76

selects option E: the code KBGD means kind square, inner with no inner shape, size small, fill mid-grey (cao) **B1**

Answer: E) A small mid-grey square

Question 77

Correct option identified (A oe, cao) - combines the confirmed code for large (9) with the confirmed code for dotted shading (C) **B1**

Answer: A

Question 78

selects option C: the code MZ means count 1, fill unshaded (white) (cao) **B1**

Answer: C) A medium unshaded (white) hexagon (upright, the hexagon has its flat top and bottom)

Question 79

selects option A: fill solid black is L, kind circle is P, inner with no inner shape is H, size small is N (cao) **B1**

Answer: A) LPHN

Question 80

selects option D: the code LDG means inner with an inner square, kind square, fill mid-grey (cao) **B1**

Answer: D) A large mid-grey square, with a small solid black square centred inside it

Question 81

selects option D: the code BK means turn turned 270 degrees clockwise, kind flag (cao) **B1**

Answer: D) A large mid-grey flag (turned 270 degrees clockwise) (upright, the flag has its pole on the left, pennant pointing right from the top)

Question 82

selects option E: inner with an inner square is P, kind pentagon is Z, fill mid-grey is N (cao) **B1**

Answer: E) PZN
