Each question shows two words with a letter missing between them, shown as (?). The missing letter must complete the word before the bracket, and the same letter must also be the first letter of the word after the bracket. Both words made this way are always real English words. Choose the option, A to E, that gives the correct missing letter.

Worked example. Find the letter which will complete the word before the bracket and begin the word after the bracket: BAR (?) ONE **Answer: N.** BAR + N = BARN (a farm building), and N + ONE = NONE (not any). N is the only letter that completes the first word and starts the second word, so N is the answer.
