Each question shows two words with a single letter missing between them, shown as (?). The same missing letter completes the word before the bracket and starts the word after the bracket, and both words that result are always genuine English words. Read all five options carefully and choose the one letter, A to E, that works for both words at once.

Worked example. Find the letter which will complete the word before the bracket and begin the word after the bracket: CLO (?) LOBE **Answer: G.** CLO + G = CLOG (a type of wooden shoe, or to block something up), and G + LOBE = GLOBE (a spherical model of the earth). G is the only letter that completes the first word and starts the second word, so G is the answer.
