Each question gives two words in brackets, for example (BAND) (RAW). Exactly one letter can be moved from the END of the first word to the START of the second word so that both of the resulting words are still correctly spelled, real English words. Decide which single letter has to move, then select it from the five lettered options. Look carefully at the worked example first, then work through the questions in order.

Worked example. (BAND) (RAW) Exactly one letter can be moved from the end of the first word to the front of the second word so that both words made are still correctly spelled real words. Which letter moves? A) D B) B C) R D) A E) W
Answer: A. Take the last letter off BAND: removing D leaves BAN, a real word. Add that same letter, D, to the front of RAW to make DRAW, a real word. So D is the letter that moves, which is option A. None of the other letters is the actual last letter of BAND, so none of them can be the letter that moves.
